

[Fiddler Web Debugging Proxy For HTTP\(S\)](#)

The screenshot shows the Fiddler Web Debugger application window. The title bar reads "Fiddler Web Debugger". The menu bar includes "File", "Edit", "Rules", "Tools", "View", and "Help". Below the menu bar is a toolbar with icons for "Replay", "Resume", "Stream", "Decode", "Keep: All sessions", "Any Process", "Find", and "Save". The main area is divided into two panes. The left pane, titled "Web Sessions", contains a table with columns for "#", "Result", "Protocol", "Host", and "URL". The right pane, titled "Inspectors", shows a "TRANSFER 1" timeline chart. The table in the left pane lists various HTTP requests, including the main page and several assets like CSS, JavaScript, and images. The timeline chart on the right visualizes the duration of these requests, with a scale from 0 to 2 seconds. The main session (row 21) is highlighted in blue in the table and corresponds to the first bar in the timeline chart.
